

Identifying meteorologic devices

Example images for identifying devices on weather stations

Temperature

Air temperature (2m)

Soil temperature (5cm)

Precipitation

Precipitation amount

Kind of precipitation, speed, size – laser distrometer

Precipitation duration (sometimes even measurement amount+kind)

Wind force and direction

Ultrasonic-anemometer

DWD Wetterstation Nossen/Sachsen - Bild 21.8.2011 - Guido Richter

Cup-Anemometer

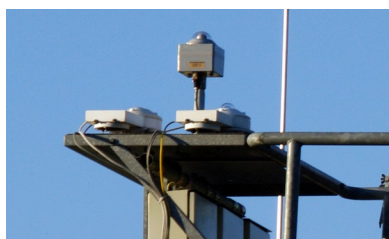

Cloud base

Ceilometer

Brightness, emission, sun

Duration of sunshine

Visibility

Snow altitude
